

LANGUAGES AND CULTURE IN HISTORY

This collection studies the role foreign languages have played in the creation of the linguistic and cultural heritage of Europe, both western and eastern, and at the individual, community, national or transnational level.

At the heart of this collection is the historical evolution of linguistic and cultural policies, internal as well as external, and their relationship with linguistic and cultural identities.

The collection takes an interdisciplinary approach to a variety of historical issues: the diffusion, the supply and the demand for foreign languages, the history of pedagogical practices, the historical relationship between languages in a given cultural context, the public and private use of foreign languages – in short, every way that foreign languages intersect with local languages in the cultural realm.

Proposals Welcomed

The series welcomes scholarly monographs and edited volumes in English and French by both established and early-career researchers.
